Dear Julian,

It appears that the referees' comments have been and can be easily addressed and I would like to ask you to make the changes/recommendations made by Ben Smith and Tony Payne and to submit a revised version for publication in TC, along with a separate file of the changes made. It would appear that we have used some of the same referees as a previous version, which has expedited the papers passage to publication. Thank you for choosing TC. I look forward to seeing the revised version shortly.

Jonathan.
